Digital Flight Debriefing Suite

Precision Debriefing for Precision Engagement

Pilots' Experience For Pilots' Needs

- Comprehensive solution for complete flight cycle support
- Compatible with existing pilots' practices and operations
- Cutting-edge, all-digital video, audio, and data features
- COTS-based, facilitating adaptation and future growth

Elbit SYSTEMS

Digital Flight Debriefing Suite

Precision Debriefing for Precision Engagement

The nature of the modern battlefield has changed dramatically and systems and platforms have become far more complex. Aircrews are faced with new missions that demand operating highly sophisticated avionics systems in extremely complicated scenarios. Meeting these new mission challenges and maximizing effectiveness demand sophisticated mission planning, logging, and debriefing tools.

With a workforce comprising active military pilots and innovative skilled engineers, Elbit System combines comprehensive operational know-how with state-of-the-art technologies to offer a suite of systems supporting the entire mission cycle.

- Digital video, audio channels and flight data recording to capture all mission data
- Flight analysis and debriefing Ground Station for review and visualization of mission data
- Mission Planning and Rehearsal System for planning and uploading mission details

Based on COTS technology and tools, the suite of systems can be used together or stand alone. With built-in flexibility, the modular suite can be tailored to customers' specific requirements and integrated into new or existing platforms and systems.

With a host of advanced features to facilitate mission planning, rehearsal, BDA and after-action reviews, Elbit Systems' Digital Flight Debriefing Suite is the optimal solution for any air force desiring to maximize training effectiveness and enhance combat readiness.

Pilots' Experience

For Pilots' Needs

Elbit Systems Ltd. focuses on upgrades and modernization programs that enhance air, ground and naval platforms with next-generation capabilities and extended life. Hundreds of upgraded, operational Western and Eastern aircraft, both fixed and rotary-wing, are evidence of **Elbit Systems'** position as one of the foremost companies in the field.

Orchestrating numerous upgrades, teaming with customers all over the globe, **Elbit Systems'** across-the-board capabilities have made it a sought-after partner in large-scale turnkey programs. Allying with **Elbit Systems** links customers to the most advanced avionics technologies, systems expertise, and building blocks that form the basis of turnkey solutions delivering enhanced performance and operational capabilities.
